Quality Policy

We are a Finnish, High Technology company that provides grain quality measurement tools and applications to its customers. We operate globally with the main office in Oulu-Finland. GrainSense's mission is to enable smarter farming with real-time crop quality measurements on the spot everywhere. Using the GrainSense solution at several levels of the food value chain enhances the use of natural resources with positive environmental impacts towards better sustainability. GrainSense aims at becoming a globally operating, vigorously growing, profitable company that is the primary choice for real-time grain analyzing. GrainSense core values are: innovation and creativity, co-operative spirit, excellent performance and high ethics.

GrainSense commits to consistently provide products and services that meet or exceed the requirements and expectations of our customers. The Directors, Management and Staff are responsible for Quality Control through the Quality Management System seeking improvement by constant review, with suppliers and distributors being encouraged to cooperate. The Company is committed to achieving customer satisfaction by the use of quality procedures which will be operated to meet or exceed the requirements of ISO 9001.
